

2017 CIT International Conference

Keynote and Workshop Presentations Now Available

Below is a listing of all the workshops and Keynote Presentations from the 2017 CIT International Conference. **We are still collecting so they are not all here yet. Please be patient with us.**

Please note the following when looking for a workshop or Keynote presentation:

1. Only two of our four Keynotes had PPT presentations. Those are attached as PDF files.
2. People sent in their presentations in two ways - either as a PPT or as a PDF. If it came in as a PPT when you click on the title it will download the presentation to your lower left corner of your monitor. If it came in as a PDF it will open right up as a document. We could not convert the PPT's to PDF as some have animation and layering which would get lost in the transfer.
3. For those presentations that are in a PPT format, the best way to view those once you have opened them up is to view as a full Slide Show. Many presenters have included animation and layering of slides so you won't get the full effect without viewing the PPT as a presentation (slide show).
- 4. We will be working to get as many, if not all, the Presentations from the conference. If there is a particular workshop that does not have a link to the presentation please be patient as we will continue to reach out to presenters. If a presenter does not wish to release their presentation, we will note that. We can always provide you with the Presenter's contact information for you to contact directly.**

KEYNOTE ADDRESSES:

[Gun violence, mental illness, and the law: Balancing risk and rights](#)

[Integrating Crisis Intervention Teams and Early Intervention Services for Serious Mental Illness:](#)

[New Partnerships for Better Community Outcomes](#)
